Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance)

This book covers new techniques in protein NMR, from basic principles to state-of-the-art research. It covers a spectrum of topics ranging from a “toolbox” for how sequence-specific resonance assignments can be obtained using a suite of 2D and 3D NMR experiments and tips on how overlap problems can be overcome. Further topics include the novel applications of Overhauser dynamic nuclear polarization methods (DNP), assessing protein structure, and aspects of solid-state NMR of macroscopically aligned membrane proteins.

This book is an ideal resource for students and researchers in the fields of biochemistry, chemistry, and pharmacology and NMR physics. Comprehensive and intuitively structured, this book examines protein NMR and new novel applications that include the latest technological advances.

This book also has the features of:

- A selection of various applications and cutting-edge advances, such as novel applications of Overhauser dynamic nuclear polarization methods (DNP) and a suite of 2D and 3D NMR experiments and tips on how overlap problems can be overcome
- A pedagogical approach to the methodology
- Engaging the reader and student with a clear, yet critical presentation of the applications

From reader reviews:

Tanisha Goss:

Here thing why this specific Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance) are different and trusted to be yours. First of all looking at a book is good however it depends in the content of computer which is the content is as scrumptious as food or not. Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance) giving you information deeper since different ways, you can find any e-book out there but there is no publication that similar with Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance). It gives you thrill studying journey, its open up your own personal eyes about the thing this happened in the world which is probably can be happened around you. You can actually bring everywhere like in park your car, café, or even in your technique home by train. Should you be having difficulties in bringing the imprinted book maybe the form of Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance) in e-book can be your substitute.

William Ullrich:

Hey guys, do you wants to finds a new book to learn? May be the book with the headline Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance) suitable to you? The particular book was written by renowned writer in this era. The actual book untitled Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance)is the one of several books that will everyone read now. This book was inspired lots of people in the world. When you read this e-book you will enter the new way of measuring that you ever know ahead of. The author explained their strategy in the simple way, and so all of people can easily to know the core of this reserve. This book will give you a lots of information about this world now. So that you can see the represented of the world on this book.

Tara Gamboa:

Playing with family in a very park, coming to see the ocean world or hanging out with buddies is thing that usually you may have done when you have spare time, and then why you don't try matter that really opposite from that. 1 activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance), you can enjoy both. It is fine combination right, you still need to miss it? What kind of hang-out type is it? Oh seriously its mind hangout folks. What? Still don't understand it, oh come on its referred to as reading friends.

Mary Killgore:

Many people spending their time frame by playing outside together with friends, fun activity together with family or just watching TV all day every day. You can have new activity to spend your whole day by looking at a book. Ugh, ya think reading a book can really hard because you have to accept the book everywhere? It

all right you can have the e-book, getting everywhere you want in your Smartphone. Like Protein NMR: Modern Techniques and Biomedical Applications (Biological Magnetic Resonance) which is having the e-book version. So , try out this book? Let's see.
