Roger J. Sullivan

Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar) Roger J. Sullivan

Through courses taught internally at the Institute for Defense Analysis, Dr. Roger Sullivan has devised a book that brings readers fully up to speed on the most essential quantitative aspects of general radar in order to introduce study of the most exciting and relevant applications to radar imaging and advanced concepts: Synthetic Aperture Radar (4 chapters), Space-time Adaptive Processing, moving target indication (MTI), bistatic radar, low probability of intercept (LPI) radar, weather radar, and ground-penetrating radar. Whether you are a radar novice or experienced professional, this is an essential reference that features the theory and practical application of formulas you use in radar design every day. With this book, you are taken step-by-step through the development of modern airborne microwave radar, up to the cutting edge of emergent technologies including new results on theoretical 2D and 3D SAR point-spread functions (PSF) and current discussions concerning dechirp/deskew processing, layover in SAR images, vibrating targets, foliage penetration, image quality parameters, and more. Plus, for students of electrical engineering, physics, and radar, this book provides the best source of basic airborne radar understanding, as well as a broad introduction to the field of radar imaging.

From reader reviews:

Daniel Reynolds:

This book untitled Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar) to be one of several books that will best seller in this year, this is because when you read this reserve you can get a lot of benefit onto it. You will easily to buy this book in the book retailer or you can order it by way of online. The publisher on this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Cell phone. So there is no reason to you personally to past this book from your list.

Aurelio Ashley:

Reading a e-book can be one of a lot of action that everyone in the world enjoys. Do you like reading book thus. There are a lot of reasons why people like it. First reading a guide will give you a lot of new facts. When you read a publication you will get new information simply because book is one of many ways to share the information or even their idea. Second, reading a book will make an individual more imaginative. When you looking at a book especially tale fantasy book the author will bring someone to imagine the story how the characters do it anything. Third, you could share your knowledge to other folks. When you read this Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar), you are able to tells your family, friends as well as soon about yours e-book. Your knowledge can inspire the mediocre, make them reading a reserve.

Charles Aranda:

Playing with family in a park, coming to see the coastal world or hanging out with good friends is thing that usually you could have done when you have spare time, after that why you don't try point that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition info. Even you love Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar), you can enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang-out type is it? Oh can occur its mind hangout guys. What? Still don't obtain it, oh come on its known as reading friends.

Jacki Warner:

In this period globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The condition of the world makes the information easier to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You can see that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to you personally is Radar Foundations for Imaging and Advanced Concepts (Electromagnetics and Radar) this book consist a lot of the information of the condition of this world now. That book was represented just how can the world has grown up. The dialect styles that writer use to explain

it is easy to understand. Typically the writer made some investigation when he makes this book. Here is why this book ideal all of you.
