**Urban Horticulture** Tina Marie Waliczek, Jayne M. Zajicek

In the wake of urbanization and technological advances, public green spaces within cities are disappearing and people are spending more time with electronic devices than with nature. **Urban Horticulture** explores the importance of horticulture to the lives, health, and well-being of urban populations. It includes contributions from experts in research and practice from across the United States, discussing the history, importance, and benefits of selected topics in urban horticulture.

This book examines types of public and private communities as well as state and federal programs to promote urban horticulture, including their history, management and administration, programming, evaluation, funding, and the benefits they provide to individuals and communities. It also reviews past and current research on school, community, public, and prison gardens. While not a straightforward textbook, it is adaptable to classroom learning, as each chapter features:

- Objectives
- Key terms
- A summary
- Review questions
- Enrichment activities
- Suggestions for further reading

The book also includes case studies and online access to examples of PowerPoint presentations that can be used in the classroom or web-based courses.

Useful for researchers, practitioners, teachers, and students, **Urban Horticulture** is a flexible resource that details how passive and active interaction with plants enriches people's lives. It presents several cases that illustrate how such interactions improve physical and mental health, quality of life, social well-being, and community growth.

**Sheri Williams:**

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some reserve, they are complained. Just little students that has reading's soul or real their leisure activity. They just do what the educator want, like asked to the library. They go to at this time there but nothing reading really. Any students feel that examining is not important, boring and also can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this era, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Urban Horticulture can make you really feel more interested to read.
