Manufacturing Automation

Yusuf Altintas

Manufacturing Automation Yusuf Altintas

Metal cutting is widely used in producing manufactured products. The technology has advanced considerably along with new materials, computers and sensors. This new edition considers the scientific principles of metal cutting and their practical application to manufacturing problems. It begins with metal cutting mechanics, principles of vibration and experimental modal analysis applied to solving shop floor problems. There is in-depth coverage of chatter vibrations, a problem experienced daily by manufacturing engineers. Programming, design and automation of CNC (computer numerical control) machine tools, NC (numerical control) programming and CAD/CAM technology are discussed. The text also covers the selection of drive actuators, feedback sensors, modelling and control of feed drives, the design of real time trajectory generation and interpolation algorithms and CNC-oriented error analysis in detail. Each chapter includes examples drawn from industry, design projects and homework problems. This is ideal for advanced undergraduate and graduate students and also practising engineers.

From reader reviews:

Ruth Ward:

Why? Because this Manufacturing Automation is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will jolt you with the secret that inside. Reading this book beside it was fantastic author who all write the book in such awesome way makes the content on the inside easier to understand, entertaining method but still convey the meaning totally. So , it is good for you because of not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of gains than the other book have got such as help improving your expertise and your critical thinking way. So , still want to delay having that book? If I were being you I will go to the book store hurriedly.

Richard Crowe:

This Manufacturing Automation is great reserve for you because the content and that is full of information for you who have always deal with world and get to make decision every minute. This specific book reveal it facts accurately using great organize word or we can point out no rambling sentences inside it. So if you are read it hurriedly you can have whole information in it. Doesn't mean it only provides straight forward sentences but tough core information with wonderful delivering sentences. Having Manufacturing Automation in your hand like having the world in your arm, facts in it is not ridiculous one particular. We can say that no reserve that offer you world throughout ten or fifteen small right but this publication already do that. So , this is good reading book. Hey there Mr. and Mrs. busy do you still doubt that will?

John Pasko:

The book untitled Manufacturing Automation contain a lot of information on this. The writer explains her idea with easy technique. The language is very simple to implement all the people, so do not necessarily worry, you can easy to read the item. The book was published by famous author. The author will bring you in the new time of literary works. You can read this book because you can read on your smart phone, or program, so you can read the book with anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official web-site in addition to order it. Have a nice read.

Ann Walsh:

Is it anyone who having spare time in that case spend it whole day by means of watching television programs or just lying down on the bed? Do you need something totally new? This Manufacturing Automation can be the response, oh how comes? The new book you know. You are therefore out of date, spending your extra time by reading in this brand new era is common not a nerd activity. So what these guides have than the others?
