Histology: A Text and Atlas: With Correlated Cell and Molecular Biology NA

Now in its seventh edition, Histology: A Text and Atlas is ideal for medical, dental, health professions, and undergraduate biology and cell biology students. This best-selling combination text and atlas includes a detailed textbook, which emphasizes clinical and functional correlates of histology fully supplemented by vividly informative illustrations and photomicrographs. Separate, superbly illustrated atlas sections follow almost every chapter and feature large-size, full-color digital photomicrographs with labels and accompanied descriptions that highlight structural and functional details of cells, tissues, and organs. Updated throughout to reflect the latest advances in the field, this "two in one" text and atlas features an outstanding art program with all illustrations completely revised and redrawn as well as a reader-friendly format including red highlighted key terms, blue clinical text, and folders that cover clinical correlations and functional considerations. *NEW! All illustrations are now completely revised and redrawn for a consistent art program.*NEW! Histology 101 sections provide students with a reader-friendly review of essential information covered in the preceding chapters.*NEW! Updated cellular and molecular biology coverage reflects the latest advances in the field.* More than 100 atlas plates that incorporate 435 full-color, high-resolution photomicrographs.* Reader-friendly highlights including red bold terms, blue clinical text, and folders featuring clinical and functional correlations that increase student understanding and facilitates efficient study.* Easy-to-understand tables aid students in learning and reviewing information (such as staining techniques) without having to rely on rote memorization.* Features of cells, tissues, and organs and their functions and locations are presented in easy-to-locate, easy-to-review bulleted lists.* Additional clinical correlation and functional consideration folders have been added providing information related to symptoms, photomicrographs of diseased tissues or organs, short histopathological descriptions, and molecular basis for clinical intervention.

From reader reviews:

Anna Harlow:

Nowadays reading books be a little more than want or need but also work as a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge your information inside the book that will improve your knowledge and information. The details you get based on what kind of e-book you read, if you want attract knowledge just go with education books but if you want experience happy read one along with theme for entertaining like comic or novel. Typically the Histology: A Text and Atlas: With Correlated Cell and Molecular Biology is kind of e-book which is giving the reader capricious experience.

Linda Carroll:

Reading a e-book can be one of a lot of exercise that everyone in the world really likes. Do you like reading book consequently. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new information. When you read a reserve you will get new information due to the fact book is one of many ways to share the information or maybe their idea. Second, studying a book will make anyone more imaginative. When you looking at a book especially tale fantasy book the author will bring you to definitely imagine the story how the people do it anything. Third, you could share your knowledge to some others. When you read this Histology: A Text and Atlas: With Correlated Cell and Molecular Biology, it is possible to tells your family, friends and soon about yours guide. Your knowledge can inspire the others, make them reading a reserve.

Eileen Williams:

Do you have something that you enjoy such as book? The book lovers usually prefer to opt for book like comic, small story and the biggest you are novel. Now, why not striving Histology: A Text and Atlas: With Correlated Cell and Molecular Biology that give your satisfaction preference will be satisfied simply by reading this book. Reading routine all over the world can be said as the method for people to know world far better then how they react toward the world. It can't be claimed constantly that reading behavior only for the geeky particular person but for all of you who wants to be success person. So , for all of you who want to start examining as your good habit, you could pick Histology: A Text and Atlas: With Correlated Cell and Molecular Biology become your starter.

John Silver:

As a student exactly feel bored for you to reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just little students that has reading's heart and soul or real their pastime. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that studying is not important, boring as well as can't see colorful photos on there. Yeah, it is being complicated. Book is very important to suit your needs. As we

know that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Histology: A Text and Atlas: With Correlated Cell and Molecular Biology can make you sense more interested to read.
