Reading Disabilities: Diagnosis and Component Processes (NATO Science Series D: (closed))

Reading Disabilities: Diagnosis and Component Processes (NATO Science Series D: (closed))

This edited volume on diagnosis and component processes of reading disabilities is based on the NATO Advanced Study Institute held in late 1991. The book, consisting of 18 chapters from cognitive psychologists and neuropsychologists from different countries, is divided into three parts. Part I discusses current issues of differential diagnosis including the role of intelligence test scores and listening comprehension tests, and the use of individual profiles with different criteria across developmental and reading and writing skills. Part II examines language-related component processes in reading disabilities. This explication includes different processing models; phonemic awareness and phonological awareness; and the mapping of phonology and alphabetic orthography. Part III provides some answers to such relevant questions as the way readers/spellers access lexical knowledge and whether poor readers/spellers use different strategies. The data for this part derive from children speaking English, Danish, German, Dutch and Greek and converge on the importance of phonological processing in reading disabilities. These studies and the others attempt to answer the challenge of differential diagnosis. Researchers and senior students will find the volume a vital and stimulating addition to their library.

(ABSTRACT)

What is the nature of differential diagnosis of reading disabilities? Are intelligence test scores relevant? How important is pseudoword reading? What about listening comprehension? How best can clinicians supplement group results with individual developmental profiles of reading and writing skills? How do different models of language-related components within a cognitive-developmental framework explain individual differences in reading disabilities? What is the nature of phonemic awareness, phonological awareness within the broad context of phonological processing in children with reading disabilities? What are the differential strategies of poor readers/spellers? These are some of the questions that the international group of contributors attempt to answer from their different research programs.

From reader reviews:

Daniel Gomez:

Book is written, printed, or illustrated for everything. You can realize everything you want by a reserve. Book has a different type. As you may know that book is important issue to bring us around the world. Adjacent to that you can your reading skill was fluently. A book Reading Disabilities: Diagnosis and Component Processes (NATO Science Series D: (closed)) will make you to possibly be smarter. You can feel much more confidence if you can know about almost everything. But some of you think which open or reading some sort of book make you bored. It isn't make you fun. Why they are often thought like that? Have you trying to find best book or ideal book with you?

Amy Petersen:

The event that you get from Reading Disabilities: Diagnosis and Component Processes (NATO Science Series D: (closed)) will be the more deep you excavating the information that hide into the words the more you get considering reading it. It does not mean that this book is hard to know but Reading Disabilities: Diagnosis and Component Processes (NATO Science Series D: (closed)) giving you excitement feeling of reading. The article author conveys their point in a number of way that can be understood through anyone who read that because the author of this e-book is well-known enough. This kind of book also makes your current vocabulary increase well. It is therefore easy to understand then can go along with you, both in printed or e-book style are available. We highly recommend you for having this kind of Reading Disabilities: Diagnosis and Component Processes (NATO Science Series D: (closed)) instantly.

Jessie Orlando:

Hey guys, do you desires to finds a new book you just read? May be the book with the name Reading Disabilities: Diagnosis and Component Processes (NATO Science Series D: (closed)) suitable to you? Often the book was written by renowned writer in this era. Often the book untitled Reading Disabilities: Diagnosis and Component Processes (NATO Science Series D: (closed))is the one of several books which everyone read now. This book was inspired a number of people in the world. When you read this book you will enter the new dimension that you ever know ahead of. The author explained their strategy in the simple way, so all of people can easily to be aware of the core of this book. This book will give you a large amount of information about this world now. So you can see the represented of the world with this book.

Beverly Thomas:

In this period of time globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You will observe that now, a lot of publisher that will print many kinds of book. Typically the book that recommended for you is Reading Disabilities: Diagnosis and Component Processes (NATO Science

Series D: (closed)) this reserve consist a lot of the information with the condition of this world now. This specific book was represented how does the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The writer made some analysis when he makes this book. Honestly, that is why this book suited all of you.
