Defects and Disorder in Crystalline and Amorphous Solids (Nato Science Series C:)

The study of defects and disorder in solids remains a central topic in solid state science. Developments in the field continue to be promoted by new experimental and theoretical techniques, while further impetus for the study of disorder in solids is provided by the growing range of applications of solid state materials in which disorder at the atomic level plays a crucial role. In this book we attempt to present a survey of fundamental and applied aspects of the field. We consider the basic aspects of defective crystalline and amorphous solids. We discuss recent studies of structural, electronic, transport, thermodynamic and spectroscopic properties of such materials. Experimental and theoretical methodologies are reviewed, and detailed consideration is given to materials such as fast ion conductors and amorphous semiconductors that are of importance in an applied context. Any survey of this large field is necessarily selective. We have chosen to emphasise insulating (especially oxidic) and semi-conducting materials. But many of the approaches and techniques we describe apply generally across the entire field of solid state science. This volume is based on a NATO ASI held at the Residencia Santa Teresa de Jesus, Madrid in September 1991. The Editor is grateful to the NATO Scientific Affairs Division for their sponsorship of this School. Thanks are also due to all who participated in and lectured at the school, but especially to the organising committee of A. V. Chadwick, G. N. Greaves, M. Grigorkiewicz, J. H. Harding and S. Kalbitzer. C. R. A.

From reader reviews:

Ellen Farnsworth:

The reserve untitled Defects and Disorder in Crystalline and Amorphous Solids (Nato Science Series C:) is the e-book that recommended to you to learn. You can see the quality of the book content that will be shown to an individual. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of study when write the book, to ensure the information that they share for you is absolutely accurate. You also might get the e-book of Defects and Disorder in Crystalline and Amorphous Solids (Nato Science Series C:) from the publisher to make you considerably more enjoy free time.

George Finch:

You may spend your free time to read this book this book. This Defects and Disorder in Crystalline and Amorphous Solids (Nato Science Series C:) is simple to bring you can read it in the recreation area, in the beach, train as well as soon. If you did not possess much space to bring often the printed book, you can buy the particular e-book. It is make you better to read it. You can save the actual book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Larry Parrish:

Is it you actually who having spare time and then spend it whole day by simply watching television programs or just lying on the bed? Do you need something new? This Defects and Disorder in Crystalline and Amorphous Solids (Nato Science Series C:) can be the respond to, oh how comes? It's a book you know. You are and so out of date, spending your extra time by reading in this brand new era is common not a nerd activity. So what these ebooks have than the others?

Tina Alley:

As a scholar exactly feel bored for you to reading. If their teacher asked them to go to the library as well as to make summary for some reserve, they are complained. Just tiny students that has reading's heart and soul or real their interest. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that examining is not important, boring and can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Defects and Disorder in Crystalline and Amorphous Solids (Nato Science Series C:) can make you really feel more interested to read.
