Web Cartography: Map Design for Interactive and Mobile Devices Ian Muehlenhaus

Web mapping technologies continue to evolve at an incredible pace. Technology is but one facet of web map creation, however. Map design, aesthetics, and user-interactivity are equally important for effective map communication. From interactivity to graphical user interface design, from symbolization choices to animation, and from layout to typeface and color selection, **Web Cartography** offers the first comprehensive overview and guide for designing beautiful and effective web maps for a variety of devices.

Written for those with a basic understanding of mapmaking, but who may not have an in-depth knowledge of web design, this book explains how to create effective interaction, animation, and layouts for maps in online and mobile platforms. Concept-driven, this reference emphasizes cartographic principles for web and mobile map design over specific software techniques. It focuses on key design concepts that will remain true regardless of software technologies used. The book is supplemented with a website providing links to stellar web maps, video tutorials and lectures, do-it-yourself labs, map critique exercises, and links to others' tutorials.

Approachable, clear, and concise, the book provides a nontechnical, approachable guide to map design for the web. It provides best practices for map communication, based on spatial data visualization and graphic design theory. By carefully avoiding overly technical jargon, it provides a solid launching pad from which students, practitioners, and innovators can begin to design aesthetically pleasing and intuitive web maps.

From reader reviews:

Brandon Li:

The particular book Web Cartography: Map Design for Interactive and Mobile Devices has a lot of information on it. So when you check out this book you can get a lot of advantage. The book was authored by the very famous author. The author makes some research before write this book. This specific book very easy to read you will get the point easily after reading this book.

Mary Williams:

Many people spending their time by playing outside using friends, fun activity along with family or just watching TV all day every day. You can have new activity to invest your whole day by studying a book. Ugh, think reading a book can really hard because you have to use the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Cell phone. Like Web Cartography: Map Design for Interactive and Mobile Devices which is finding the e-book version. So , why not try out this book? Let's view.

Grace Godwin:

Do you like reading a reserve? Confuse to looking for your preferred book? Or your book had been rare? Why so many problem for the book? But almost any people feel that they enjoy with regard to reading. Some people likes looking at, not only science book and also novel and Web Cartography: Map Design for Interactive and Mobile Devices or maybe others sources were given information for you. After you know how the truly amazing a book, you feel would like to read more and more. Science book was created for teacher or students especially. Those guides are helping them to put their knowledge. In different case, beside science book, any other book likes Web Cartography: Map Design for Interactive and Mobile Devices to make your spare time more colorful. Many types of book like this.

Leslie Bergeron:

As a university student exactly feel bored to help reading. If their teacher inquired them to go to the library or even make summary for some reserve, they are complained. Just little students that has reading's heart and soul or real their passion. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Web Cartography: Map Design for Interactive and Mobile Devices can make you sense more interested to read.
