Human-Computer Interaction: Development Process (Human Factors and Ergonomics)

Human-Computer Interaction: Development Process (Human Factors and Ergonomics)

Hailed on first publication as a compendium of foundational principles and cutting-edge research, *The Human-Computer Interaction Handbook* has become the gold standard reference in this field. Derived from select chapters of this groundbreaking resource, **Human-Computer Interaction: The Development Practice** addresses requirements specification, design and development, and testing and evaluation activities. It also covers task analysis, contextual design, personas, scenario-based design, participatory design, and a variety of evaluation techniques including usability testing, inspection-based and model-based evaluation, and survey design.

The book includes contributions from eminent researchers and professionals from around the world who, under the guidance of editors Andrew Sear and Julie Jacko, explore visionary perspectives and developments that fundamentally transform the discipline and its practice.
