Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series) Marc Lankhorst

An enterprise architecture tries to describe and control an organisation's structure, processes, applications, systems and techniques in an integrated way. The unambiguous specification and description of components and their relationships in such an architecture requires a coherent architecture modelling language.

Lankhorst and his co-authors present such an enterprise modelling language that captures the complexity of architectural domains and their relations and allows the construction of integrated enterprise architecture models. They provide architects with concrete instruments that improve their architectural practice. As this is not enough, they additionally present techniques and heuristics for communicating with all relevant stakeholders about these architectures. Since an architecture model is useful not only for providing insight into the current or future situation but can also be used to evaluate the transition from 'as-is' to 'to-be', the authors also describe analysis methods for assessing both the qualitative impact of changes to an architecture and the quantitative aspects of architectures, such as performance and cost issues.

The modelling language presented has been proven in practice in many real-life case studies and has been adopted by The Open Group as an international standard. So this book is an ideal companion for enterprise IT or business architects in industry as well as for computer or management science students studying the field of enterprise architecture.

From reader reviews:

Virginia Glass:

Throughout other case, little folks like to read book Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series). You can choose the best book if you want reading a book. So long as we know about how is important the book Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series). You can add knowledge and of course you can around the world by the book. Absolutely right, because from book you can recognize everything! From your country till foreign or abroad you will end up known. About simple point until wonderful thing you can know that. In this era, we can open a book or maybe searching by internet device. It is called e-book. You can use it when you feel fed up to go to the library. Let's go through.

Henry Reavis:

Hey guys, do you wishes to finds a new book to study? May be the book with the headline Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series) suitable to you? Typically the book was written by well known writer in this era. The book untitled Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series) is the one of several books that everyone read now. This specific book was inspired a lot of people in the world. When you read this book you will enter the new dimension that you ever know previous to. The author explained their concept in the simple way, so all of people can easily to recognise the core of this book. This book will give you a large amount of information about this world now. So that you can see the represented of the world within this book.

David Johnston:

You will get this Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series) by go to the bookstore or Mall. Just simply viewing or reviewing it could to be your solve problem if you get difficulties on your knowledge. Kinds of this e-book are various. Not only by simply written or printed but in addition can you enjoy this book through e-book. In the modern era just like now, you just looking from your mobile phone and searching what their problem. Right now, choose your own personal ways to get more information about your book. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose proper ways for you.

Hubert Smith:
