Person-Centered Methods: Configural Frequency Analysis (CFA) and Other Methods for the Analysis of Contingency Tables (SpringerBriefs in Statistics) Mark Stemmler

This book takes an easy-to-understand look at the statistical approach called the person-centered method. Instead of analyzing means, variances and covariances of scale scores as in the common variable-centered approach, the person-centered approach analyzes persons or objects grouped according to their characteristic patterns or configurations in contingency tables. The main focus of the book will be on Configural Frequency Analysis (CFA; Lienert and Krauth, 1975) which is a statistical method that looks for over and under-frequented cells or patterns. Over frequented means that the observations in this cell or configuration are observed more often than expected, under-frequented means that this cell or configuration is observed less often than expected. In CFA a pattern or configuration that contains more observed cases than expected is called a *type*; similarly, a pattern or configuration that is less observed than expected are called an *antitype*. CFA is similar to log-linear modeling. In log-linear modeling the goal is to come up with a fitting model including all important variables. Instead of fitting a model, CFA looks at the significant residuals of a log-linear model.

The book describes the use of an R-package called **confreq** (derived from **Configural Frequency Analysis**). The use of the software package is described and demonstrated with data examples.

From reader reviews:

Betty Young:

The book Person-Centered Methods: Configural Frequency Analysis (CFA) and Other Methods for the Analysis of Contingency Tables (SpringerBriefs in Statistics) can give more knowledge and information about everything you want. Why then must we leave a very important thing like a book Person-Centered Methods: Configural Frequency Analysis (CFA) and Other Methods for the Analysis of Contingency Tables (SpringerBriefs in Statistics)? A number of you have a different opinion about publication. But one aim which book can give many info for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or data that you take for that, you can give for each other; it is possible to share all of these. Book Person-Centered Methods: Configural Frequency Analysis (CFA) and Other Methods for the Analysis of Contingency Tables (SpringerBriefs in Statistics) has simple shape nevertheless, you know: it has great and large function for you. You can seem the enormous world by start and read a e-book. So it is very wonderful.

Debra Lovern:

This book untitled Person-Centered Methods: Configural Frequency Analysis (CFA) and Other Methods for the Analysis of Contingency Tables (SpringerBriefs in Statistics) to be one of several books that will best seller in this year, this is because when you read this publication you can get a lot of benefit into it. You will easily to buy this specific book in the book retailer or you can order it by means of online. The publisher of this book sells the e-book too. It makes you quickly to read this book, as you can read this book in your Touch screen phone. So there is no reason for your requirements to past this book from your list.

Karen Perl:

What is your hobby? Have you heard that question when you got students? We believe that that issue was given by teacher to the students. Many kinds of hobby, Every person has different hobby. And you know that little person such as reading or as reading through become their hobby. You must know that reading is very important and also book as to be the thing. Book is important thing to increase you knowledge, except your current teacher or lecturer. You discover good news or update concerning something by book. Different categories of books that can you decide to try be your object. One of them is actually Person-Centered Methods: Configural Frequency Analysis (CFA) and Other Methods for the Analysis of Contingency Tables (SpringerBriefs in Statistics).

Jacqueline Britt:

Many people said that they feel bored when they reading a book. They are directly felt that when they get a half parts of the book. You can choose the particular book Person-Centered Methods: Configural Frequency Analysis (CFA) and Other Methods for the Analysis of Contingency Tables (SpringerBriefs in Statistics) to

make your current reading is interesting. Your own personal skill of reading proficiency is developing when you like reading. Try to choose basic book to make you enjoy you just read it and mingle the opinion about book and studying especially. It is to be initially opinion for you to like to wide open a book and go through it. Beside that the e-book Person-Centered Methods: Configural Frequency Analysis (CFA) and Other Methods for the Analysis of Contingency Tables (SpringerBriefs in Statistics) can to be your brand new friend when you're really feel alone and confuse with what must you're doing of that time.
