Design of Clothing Manufacturing Processes: A Systematic Approach to Planning, Scheduling and Control (Woodhead Publishing Series in Textiles) Jelka Gersak

The era of mass manufacturing of clothing and other textile products is coming to an end; what is emerging is a post-industrial production system that is able to achieve the goal of mass-customised, low volume production, where the conventional borders between product design, production and user are beginning to merge. To continue developing knowledge on how to design better products and services, we need to design better clothing manufacturing processes grounded in science, technology, and management to help the clothing industry to compete more effectively. Design of clothing manufacturing processes reviews key issues in the design of more rapid, integrated and flexible clothing manufacturing processes.

The eight chapters of the book provide a detailed coverage of the design of clothing manufacturing processes using a systematic approach to planning, scheduling and control. The book starts with an overview of standardised clothing classification systems and terminologies for individual clothing types. Chapter 2 explores the development of standardised sizing systems. Chapter 3 reviews the key issues in the development of a garment collection. Chapters 4 to 7 discuss particular aspects of clothing production, ranging from planning and organization to monitoring and control. Finally, chapter 8 provides an overview of common quality requirements for clothing textile materials.

Design of clothing manufacturing processes is intended for R&D managers, researchers, technologists and designers throughout the clothing industry, as well as academic researchers in the field of clothing design, engineering and other aspects of clothing production.

- Considers in detail the design of sizing and classification systems
- Discusses the planning required in all aspects of clothing production from design and pattern making to manufacture
- Overviews the management of clothing production and material quality requirements

From reader reviews:

Cassandra Martin:

As people who live in the particular modest era should be upgrade about what going on or details even knowledge to make these individuals keep up with the era that is certainly always change and advance. Some of you maybe may update themselves by reading through books. It is a good choice for you personally but the problems coming to you is you don't know what type you should start with. This Design of Clothing Manufacturing Processes: A Systematic Approach to Planning, Scheduling and Control (Woodhead Publishing Series in Textiles) is our recommendation to help you keep up with the world. Why, as this book serves what you want and want in this era.

Kerry Diaz:

Do you one of people who can't read enjoyable if the sentence chained within the straightway, hold on guys this specific aren't like that. This Design of Clothing Manufacturing Processes: A Systematic Approach to Planning, Scheduling and Control (Woodhead Publishing Series in Textiles) book is readable by you who hate those perfect word style. You will find the information here are arrange for enjoyable reading through experience without leaving actually decrease the knowledge that want to deliver to you. The writer involving Design of Clothing Manufacturing Processes: A Systematic Approach to Planning, Scheduling and Control (Woodhead Publishing Series in Textiles) content conveys thinking easily to understand by a lot of people. The printed and e-book are not different in the articles but it just different such as it. So , do you still thinking Design of Clothing Manufacturing Processes: A Systematic Approach to Planning, Scheduling and Control (Woodhead Publishing Series in Textiles) is not loveable to be your top listing reading book?

Kathy Norvell:

The e-book with title Design of Clothing Manufacturing Processes: A Systematic Approach to Planning, Scheduling and Control (Woodhead Publishing Series in Textiles) possesses a lot of information that you can understand it. You can get a lot of help after read this book. This specific book exist new understanding the information that exist in this book represented the condition of the world today. That is important to yo7u to know how the improvement of the world. That book will bring you within new era of the the positive effect. You can read the e-book on the smart phone, so you can read this anywhere you want.

Christina Almonte:

Precisely why? Because this Design of Clothing Manufacturing Processes: A Systematic Approach to Planning, Scheduling and Control (Woodhead Publishing Series in Textiles) is an unordinary book that the inside of the reserve waiting for you to snap it but latter it will distress you with the secret the idea inside. Reading this book alongside it was fantastic author who write the book in such wonderful way makes the content inside easier to understand, entertaining method but still convey the meaning totally. So , it is good

for you because of not hesitating having this nowadays or you going to regret it. This amazing book will give you a lot of positive aspects than the other book possess such as help improving your expertise and your critical thinking approach. So , still want to hold up having that book? If I had been you I will go to the e-book store hurriedly.
