RHCSA is an entry-level certification that focuses on actual competencies at system administration, including installation and configuration of a Red Hat Linux system and attaching it to a live network running network services.

To achieve the RHCSA certification the student must pass EX200, a half-day hands-on lab exam. There is no prerequisite for the exam, but Red Hat recommends preparing for the exam by taking courses in Red Hat System Administration (RH124 or RH135) if one does not have previous experience.

RHCSA was launched in 2002 as Red Hat Certified Technician (RHCT). As of July 2009 there were 30,000 RHCTs. In November 2010 it was renamed to RHCSA.

This self-study exam preparation guide for the RHCSA certification exam contains everything you need to test yourself and pass the Exam. All Exam topics are covered and insider secrets, complete explanations of all RHCSA subjects, test tricks and tips, numerous highly realistic sample questions, and exercises designed to strengthen understanding of RHCSA concepts and prepare you for exam success on the first attempt are provided.

Put your knowledge and experience to the test. Achieve RHCSA certification and accelerate your career.
