Field and Galois Theory (Graduate Texts in Mathematics) (v. 167)

Patrick Morandi

Field and Galois Theory (Graduate Texts in Mathematics) (v. 167) Patrick Morandi

In the fall of 1990, I taught Math 581 at New Mexico State University for the first time. This course on field theory is the first semester of the year-long graduate algebra course here at NMSU. In the back of my mind, I thought it would be nice someday to write a book on field theory, one of my favorite mathematical subjects, and I wrote a crude form of lecture notes that semester. Those notes sat undisturbed for three years until late in 1993 when I finally made the decision to turn the notes into a book. The notes were greatly expanded and rewritten, and they were in a form sufficient to be used as the text for Math 581 when I taught it again in the fall of 1994. Part of my desire to write a textbook was due to the nonstandard format of our graduate algebra sequence. The first semester of our sequence is field theory. Our graduate students generally pick up group and ring theory in a senior-level course prior to taking field theory. Since we start with field theory, we would have to jump into the middle of most graduate algebra textbooks. This can make reading the text difficult by not knowing what the author did before the field theory chapters. Therefore, a book devoted to field theory is desirable for us as a text. While there are a number of field theory books around, most of these were less complete than I wanted.

From reader reviews:

Winford Patterson:

The book Field and Galois Theory (Graduate Texts in Mathematics) (v. 167) make one feel enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can to be your best friend when you getting tension or having big problem with your subject. If you can make studying a book Field and Galois Theory (Graduate Texts in Mathematics) (v. 167) for being your habit, you can get far more advantages, like add your current capable, increase your knowledge about a number of or all subjects. You are able to know everything if you like open up and read a publication Field and Galois Theory (Graduate Texts in Mathematics) (v. 167). Kinds of book are a lot of. It means that, science book or encyclopedia or some others. So , how do you think about this e-book?

Pearl Young:

Reading a e-book can be one of a lot of task that everyone in the world enjoys. Do you like reading book so. There are a lot of reasons why people like it. First reading a book will give you a lot of new data. When you read a e-book you will get new information due to the fact book is one of a number of ways to share the information or their idea. Second, examining a book will make an individual more imaginative. When you examining a book especially fictional works book the author will bring you to imagine the story how the people do it anything. Third, you may share your knowledge to other individuals. When you read this Field and Galois Theory (Graduate Texts in Mathematics) (v. 167), it is possible to tells your family, friends and also soon about yours reserve. Your knowledge can inspire the others, make them reading a guide.

Michael Barth:

Exactly why? Because this Field and Galois Theory (Graduate Texts in Mathematics) (v. 167) is an unordinary book that the inside of the e-book waiting for you to snap that but latter it will jolt you with the secret that inside. Reading this book next to it was fantastic author who all write the book in such awesome way makes the content interior easier to understand, entertaining method but still convey the meaning completely. So , it is good for you because of not hesitating having this any longer or you going to regret it. This unique book will give you a lot of benefits than the other book include such as help improving your expertise and your critical thinking technique. So , still want to hold up having that book? If I ended up you I will go to the e-book store hurriedly.

Sheri Combs:

In this time globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, magazine, book, and soon. You can view that now, a lot of publisher which print many kinds of book. The actual book that recommended to you personally is Field and Galois Theory (Graduate Texts in Mathematics) (v. 167)

this publication consist a lot of the information from the condition of this world now. This book was represented so why is the world has grown up. The language styles that writer value to explain it is easy to understand. Often the writer made some investigation when he makes this book. Here is why this book appropriate all of you.
