Jinliang He, Rong Zeng, Bo Zhang

Methodology and Technology for Power System Grounding Jinliang He, Rong Zeng, Bo Zhang

Grounding is the fundamental measures to ensure the safe operation of power systems, including power apparatus and control/monitoring systems, and guarantee the personal safety. Grounding technology is an interdisciplinary involving electrical engineering, high voltage technology, electric safety, electromagnetics, numerical analysis, and geological exploration

Methodology and Technology for Power System Grounding:

- Covers all topics related to power system grounding
- Presents fundamentals and theories of grounding systems
- Well balances technology and methodology related to grounding system design
- Helps to understand the grounding analysis softwares
- Highlights the advanced research works in the field of grounding systems
- Comprehensively introduces numerical analysis methods
- Discovers impulse ionization phenomenon of soil around the grounding conductors
- Touches on lightning impulse characteristics of grounding devices for towers and buildings

As a comprehensive treatment of the topic, *Methodology and Technology for Power System Grounding* is ideal for engineers and researchers in power system, lightning protection, and grounding. The book will also better equip postgraduates, senior undergraduate students in electrical engineering.

From reader reviews:

Hester Crutchfield:

What do you about book? It is not important along? Or just adding material when you really need something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every individual has many questions above. They have to answer that question since just their can do in which. It said that about reserve. Book is familiar on every person. Yes, it is proper. Because start from on guardería until university need this kind of Methodology and Technology for Power System Grounding to read.

Alla Haynes:

The knowledge that you get from Methodology and Technology for Power System Grounding could be the more deep you excavating the information that hide inside the words the more you get serious about reading it. It does not mean that this book is hard to comprehend but Methodology and Technology for Power System Grounding giving you enjoyment feeling of reading. The article author conveys their point in selected way that can be understood by means of anyone who read it because the author of this e-book is well-known enough. This particular book also makes your own personal vocabulary increase well. That makes it easy to understand then can go along with you, both in printed or e-book style are available. We propose you for having this specific Methodology and Technology for Power System Grounding instantly.

Lori Roth:

Do you have something that that suits you such as book? The publication lovers usually prefer to pick book like comic, small story and the biggest the first is novel. Now, why not striving Methodology and Technology for Power System Grounding that give your satisfaction preference will be satisfied by simply reading this book. Reading habit all over the world can be said as the opportunity for people to know world far better then how they react in the direction of the world. It can't be mentioned constantly that reading habit only for the geeky man or woman but for all of you who wants to always be success person. So , for all of you who want to start looking at as your good habit, you can pick Methodology and Technology for Power System Grounding become your own starter.

Lily Spivey:

That reserve can make you to feel relax. This kind of book Methodology and Technology for Power System Grounding was multi-colored and of course has pictures on the website. As we know that book Methodology and Technology for Power System Grounding has many kinds or category. Start from kids until teens. For example Naruto or Detective Conan you can read and think that you are the character on there. Therefore , not at all of book tend to be make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading which.
