How Not to Be Wrong: The Power of Mathematical Thinking Jordan Ellenberg

The *Freakonomics* of math--a math-world superstar unveils the hidden beauty and logic of the world and puts its power in our hands

The math we learn in school can seem like a dull set of rules, laid down by the ancients and not to be questioned. In *How Not to Be Wrong*, Jordan Ellenberg shows us how terribly limiting this view is: Math isn't confined to abstract incidents that never occur in real life, but rather touches everything we do--the whole world is shot through with it.

Math allows us to see the hidden structures underneath the messy and chaotic surface of our world. It's a science of not being wrong, hammered out by centuries of hard work and argument. Armed with the tools of mathematics, we can see through to the true meaning of information we take for granted: How early should you get to the airport? What does "public opinion" really represent? Why do tall parents have shorter children? Who really won Florida in 2000? And how likely are you, really, to develop cancer?

How Not to Be Wrong presents the surprising revelations behind all of these questions and many more, using the mathematician's method of analyzing life and exposing the hard-won insights of the academic community to the layman--minus the jargon. Ellenberg chases mathematical threads through a vast range of time and space, from the everyday to the cosmic, encountering, among other things, baseball, Reaganomics, daring lottery schemes, Voltaire, the replicability crisis in psychology, Italian Renaissance painting, artificial languages, the development of non-Euclidean geometry, the coming obesity apocalypse, Antonin Scalia's views on crime and punishment, the psychology of slime molds, what Facebook can and can't figure out about you, and the existence of God.

Ellenberg pulls from history as well as from the latest theoretical developments to provide those not trained in math with the knowledge they need. Math, as Ellenberg says, is "an atomic-powered prosthesis that you attach to your common sense, vastly multiplying its reach and strength." With the tools of mathematics in hand, you can understand the world in a deeper, more meaningful way. *How Not to Be Wrong* will show you how.

From reader reviews:

Melissa Hopkins:

Do you have favorite book? For those who have, what is your favorite's book? E-book is very important thing for us to find out everything in the world. Each e-book has different aim or maybe goal; it means that guide has different type. Some people truly feel enjoy to spend their the perfect time to read a book. They can be reading whatever they get because their hobby is reading a book. Why not the person who don't like reading a book? Sometime, particular person feel need book whenever they found difficult problem or even exercise. Well, probably you will need this How Not to Be Wrong: The Power of Mathematical Thinking.

Michael Hamrick:

This How Not to Be Wrong: The Power of Mathematical Thinking book is not ordinary book, you have it then the world is in your hands. The benefit you receive by reading this book is definitely information inside this publication incredible fresh, you will get facts which is getting deeper a person read a lot of information you will get. This specific How Not to Be Wrong: The Power of Mathematical Thinking without we realize teach the one who examining it become critical in imagining and analyzing. Don't become worry How Not to Be Wrong: The Power of Mathematical Thinking can bring when you are and not make your case space or bookshelves' become full because you can have it inside your lovely laptop even cell phone. This How Not to Be Wrong: The Power of Mathematical Thinking having fine arrangement in word and layout, so you will not sense uninterested in reading.

Philip Cooper:

Spent a free time to be fun activity to accomplish! A lot of people spent their free time with their family, or their very own friends. Usually they accomplishing activity like watching television, going to beach, or picnic from the park. They actually doing same every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? Might be reading a book may be option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the publication untitled How Not to Be Wrong: The Power of Mathematical Thinking can be good book to read. May be it may be best activity to you.

Manuel Frazier:

Publication is one of source of expertise. We can add our understanding from it. Not only for students and also native or citizen need book to know the up-date information of year to be able to year. As we know those guides have many advantages. Beside we all add our knowledge, can also bring us to around the world. By book How Not to Be Wrong: The Power of Mathematical Thinking we can have more advantage. Don't someone to be creative people? To be creative person must prefer to read a book. Just simply choose the best book that suitable with your aim. Don't become doubt to change your life by this book How Not to Be Wrong: The Power of Mathematical Thinking. You can more desirable than now.
