Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics)

Harvey Checkoway, Neil Pearce, David Kriebel

This widely used text provides a clear and critical summary of research approaches to the epidemiological study of workplace hazards. It describes the historical development of occupational epidemiology, methods for characterizing occupational exposures, and techniques for designing and implementing epidemiologic studies in this area. The relative strengths and limitations of various study designs for investigating specific health outcomes are emphasized. Also included are more advanced discussions of statistical analysis, exposure and dose modeling, and subsequent applications of data derived from epidemiologic research, as in meta-analysis, pooled analysis, and statistical analysis, exposure and dose modeling, and risk assessment. Since the first edition was published 15 years ago, there have been numerous advances in epidemiologic methods to accommodate a broadened scope of investigations of occupational exposures and associated adverse health outcomes. Thus, in this Second Edition the authors have updated their discussions of methodology to include such topics as case-cohort and case-crossover designs and statistical analysis of repeated measures data, and have expanded the examples they use throughout the book to demonstrate the applications of these methods to a wide range of acute and chronic health outcomes. They have also added a new chapter on occupational health surveillance. Their text is unique for its strong emphasis on the definition and assessment of exposures, the application of quantitative exposure data to epidemiologic models, and the recognition that improvements in workplace risk identification and quantification will come from careful integration of these approaches. This fine volume will serve both as a textbook for courses on occupational epidemiology and as a practical handbook of the design, implementation, and evaluation of research in this field.

From reader reviews:

Margie Turner:

What do you about book? It is not important to you? Or just adding material when you require something to explain what the ones you have problem? How about your free time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is make you feel bored faster. And you have free time? What did you do? Everybody has many questions above. They should answer that question mainly because just their can do that. It said that about guide. Book is familiar in each person. Yes, it is suitable. Because start from on pre-school until university need this Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) to read.

Lien Fugate:

Nowadays reading books are more than want or need but also get a life style. This reading behavior give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book that will improve your knowledge and information. The knowledge you get based on what kind of e-book you read, if you want get more knowledge just go with education books but if you want sense happy read one using theme for entertaining including comic or novel. Typically the Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) is kind of guide which is giving the reader unforeseen experience.

Ida Johnson:

The publication untitled Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) is the guide that recommended to you you just read. You can see the quality of the e-book content that will be shown to a person. The language that publisher use to explained their ideas are easily to understand. The copy writer was did a lot of investigation when write the book, so the information that they share for your requirements is absolutely accurate. You also could get the e-book of Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) from the publisher to make you considerably more enjoy free time.

Joel Wall:

Your reading sixth sense will not betray a person, why because this Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) e-book written by well-known writer who knows well how to make book which might be understand by anyone who read the book. Written in good manner for you, dripping every ideas and creating skill only for eliminate your own personal hunger then you still question Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) as good book but not only by the cover but also with the content. This is one guide that can break don't assess book by its include, so do you still needing yet another sixth sense to pick this!? Oh come on your examining sixth sense already told you so why you have to listening to one more sixth sense.
