Introduction to Computing Using Python: An Application Development Focus Ljubomir Perkovic

Perkovic's Introduction to Programming Using Python: An Application Development Focus, 2e is more than just an introduction to programming. It is an inclusive introduction to Computer Science that takes the pedagogical approach of "the right tool for the job at the right moment," and focuses on application development. The approach is hands-on and problem-oriented, with practice problems and solutions appearing throughout the text. The text is imperative-first, but does not shy away from discussing objects early where appropriate. Discussions of user-defined classes and Object-Oriented Programming appear later in the text, when students have more background and concepts can be motivated. Chapters include an introduction to problem solving techniques and classical algorithms, problem-solving and programming and ways to apply core skills to application development. This edition also includes examples and practice problems provided within a greater variety of domains. An additional chapter of Case Studies is exclusive to the Wiley E-Text, providing students with real life applications using the concepts and tools covered in the chapters.

From reader reviews:

Mable Garza:

Nowadays reading books be a little more than want or need but also work as a life style. This reading practice give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The info you get based on what kind of publication you read, if you want have more knowledge just go with training books but if you want really feel happy read one along with theme for entertaining for example comic or novel. The actual Introduction to Computing Using Python: An Application Development Focus is kind of reserve which is giving the reader unstable experience.

Jennifer Phinney:

Information is provisions for folks to get better life, information nowadays can get by anyone from everywhere. The information can be a understanding or any news even an issue. What people must be consider if those information which is within the former life are challenging to be find than now's taking seriously which one works to believe or which one the resource are convinced. If you receive the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All of those possibilities will not happen throughout you if you take Introduction to Computing Using Python: An Application Development Focus as your daily resource information.

Chris Gibbons:

Is it anyone who having spare time then spend it whole day through watching television programs or just resting on the bed? Do you need something new? This Introduction to Computing Using Python: An Application Development Focus can be the respond to, oh how comes? The new book you know. You are consequently out of date, spending your spare time by reading in this completely new era is common not a geek activity. So what these guides have than the others?

Lawrence Fox:

As we know that book is significant thing to add our knowledge for everything. By a e-book we can know everything we wish. A book is a range of written, printed, illustrated or even blank sheet. Every year was exactly added. This book Introduction to Computing Using Python: An Application Development Focus was filled concerning science. Spend your spare time to add your knowledge about your science competence. Some people has different feel when they reading some sort of book. If you know how big good thing about a book, you can really feel enjoy to read a book. In the modern era like at this point, many ways to get book which you wanted.
