Research Handbook on International Environmental Law (Research Handbooks in International Law series/Elgar original reference) Malgosia Fitzmaurice, David Ong, Panos Merkouris

This wide-ranging and comprehensive *Handbook* examines recent developments in international environmental law (IEL) and the crossover effects of this expansion on other areas of international law, such as trade law and the law of the sea.

The expert contributors offer analyses of foundational issues in IEL, such as responsibility for environmental damage, sustainable development and the precautionary principle, alongside studies in topical subject areas including marine protection and the law of international watercourses. This *Research Handbook* offers an in-depth analysis of IEL, both as a field of law in its own right, and as part of the wider system of international law. It gives a comprehensive view of IEL in all its forms and complexity.

With thorough examination of specific environmental regimes and compliance mechanisms, this handbook will be an indispensable resource for legal scholars, students and practitioners alike.
