Spatio-temporal Design: Advances in Efficient Data Acquisition (Statistics in Practice)

Spatio-temporal Design: Advances in Efficient Data Acquisition (Statistics in Practice)

A state-of-the-art presentation of optimum spatio-temporal sampling design - bridging classic ideas with modern statistical modeling concepts and the latest computational methods.

Spatio-temporal Design presents a comprehensive state-of-the-art presentation combining both classical and modern treatments of network design and planning for spatial and spatio-temporal data acquisition. A common problem set is interwoven throughout the chapters, providing various perspectives to illustrate a complete insight to the problem at hand.

Motivated by the high demand for statistical analysis of data that takes spatial and spatio-temporal information into account, this book incorporates ideas from the areas of time series, spatial statistics and stochastic processes, and combines them to discuss optimum spatio-temporal sampling design.

Spatio-temporal Design: Advances in Efficient Data Acquisition:

- Provides an up-to-date account of how to collect space-time data for monitoring, with a focus on statistical aspects and the latest computational methods
- Discusses basic methods and distinguishes between design and model-based approaches to collecting space-time data.
- Features model-based frequentist design for univariate and multivariate geostatistics, and second-phase spatial sampling.
- Integrates common data examples and case studies throughout the book in order to demonstrate the different approaches and their integration.
- Includes real data sets, data generating mechanisms and simulation scenarios.
- Accompanied by a supporting website featuring R code.

Spatio-temporal Design presents an excellent book for graduate level students as well as a valuable reference for researchers and practitioners in the fields of applied mathematics, engineering, and the environmental and health sciences.

From reader reviews:

Isaiah Owen:

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each reserve has different aim or maybe goal; it means that reserve has different type. Some people really feel enjoy to spend their the perfect time to read a book. They are really reading whatever they have because their hobby is actually reading a book. What about the person who don't like looking at a book? Sometime, person feel need book whenever they found difficult problem as well as exercise. Well, probably you'll have this Spatio-temporal Design: Advances in Efficient Data Acquisition (Statistics in Practice).

Fred Miller:

This book untitled Spatio-temporal Design: Advances in Efficient Data Acquisition (Statistics in Practice) to be one of several books which best seller in this year, honestly, that is because when you read this book you can get a lot of benefit on it. You will easily to buy this specific book in the book retailer or you can order it by way of online. The publisher on this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Mobile phone. So there is no reason to you personally to past this guide from your list.

Lillian Thornton:

As we know that book is vital thing to add our knowledge for everything. By a publication we can know everything we want. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year ended up being exactly added. This book Spatio-temporal Design: Advances in Efficient Data Acquisition (Statistics in Practice) was filled in relation to science. Spend your extra time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading a book. If you know how big good thing about a book, you can truly feel enjoy to read a e-book. In the modern era like currently, many ways to get book that you just wanted.

Donald Barber:

As a college student exactly feel bored in order to reading. If their teacher asked them to go to the library or to make summary for some e-book, they are complained. Just tiny students that has reading's soul or real their passion. They just do what the educator want, like asked to go to the library. They go to at this time there but nothing reading really. Any students feel that reading through is not important, boring as well as can't see colorful photos on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Spatio-temporal Design: Advances in Efficient Data Acquisition (Statistics in Practice) can make you experience more interested to read.
